

B I V I S

WHAT IS IT

Complementary feed indicated in a diet that supports the immune system. It is helpful during treatments for strengthening the natural defences of the organism.

MAIN INGREDIENTS

• *Echinacea purpurea*

Many studies show its property of supporting the antiviral, antibacterial, anti-inflammatory and skin regenerating activities of the body. Echinacea supports the immunostimulatory activity of the animal, especially during viral, bacterial and allergic infections, both acute and chronic ones.

• *Eleutherococcus senticosus*

Commonly known as Siberian ginseng, is an herb used in traditional medicine to combat fatigue. It is considered an adaptogen compound: it is indicated in all situations that weaken the organism, it can support physical performance during period of high intensity exercise and reduce the effects of stress stimulating the production of antibodies. Eleutherococcus also promotes appetite.

INSTRUCTION FOR USE: 500-1000 ml every 1000 liters of water

PACKING: 5-liter and 20-liter tanks
