

PODALOE gel

INDICATIONS AND PROPERTIES

The products supports the sanitizing treatment of hooves and the local treatment of dermatitis.

The fresh gel contained in the leaves of aloe shows a regenerative effect on the tissues, especially during cutaneous stress.

Aloe can help to stimulate the painkiller and anti-inflammatory effect of the organism. It also supports the soothing activity and the regeneration of damaged tissues, thus promoting healing.

Zinc is involved in the formation of the elastic fibers of the connective tissue and promotes a rapid healing, an antiviral and antioxidant activity.

Copper supports the antiseptic and detoxifying action against bacterial and viral infectious, it also increases the production of elastin and collagen and helps the immune system.
